

15.6-inch Windows/Android Die-cast Aluminum Touch POS Terminal

(M/N: POS-1561)

OCOM POS-1561 POS terminal has aluminium alloy shell and base,It has intel Celeron and intel core I series CPU for option. it has rich I/O interfaces to be connected to more external devices.

Features:

Good heat dissipation system make POS work well in harsher environment;

Super thin machine body and stylish design improve your higher profile;

Cables management make cashier desk more tidier and save much space for use;

Supports "One Line connect" secondary screen;

More scientific separated structure for easy maintenance and disassembly;

Double folding structure base make package smaller and save much cost for shipping;

Flexible base allows POS to be placed in more ways and suitable for different counters.

The scientific heat dissipation design allows the POS machine to have good heat dissipation performance and can still work normally even at an ambient temperature of 50 degrees Celsius.

The heat dissipation silicone grease is attached to the CPU heat sink.

And the heat dissipation silicone grease is adhered to the die-cast aluminum shell to quickly transfer heat.

More scientific layout structure makes the POS machine maintenance easier.

Tips: The mainboard of POS-1561 is installed behind the screen. When the casing is disassembled, the stand and the casing are completely separated, and the screen cables will not be damaged during disassembly.

Quality Control

Reliability Testing Equipment

Consistent Temperature And Humidity Chamber

By adjusting the temperature in the thermostat to simulate the use environment from -10 degrees Celsius to 55 degrees Celsius, test the reliability of the POS machine in high and low temperature environments.

Electrostatic Discharge Generator

Use Electrostatic Discharge Generator to simulate tip discharge and test the POS machine's ability to protect against static electricity during air discharge and contact discharge.

Transport Vibration Testing Machine

Use the Transport Vibration Testing Machine to simulate vibrations during transportation and monitor the firmness of the connectors throughout the POS machine and the rationality of the internal structure.
